

# PLANNED GIVING

## YOUR LEGACY OF LOVE AND CARING

**Each year:** Thanks to your generosity, thousands of families living at our House can focus on what matters most—their critically ill children.

**Preparing and caring:** Your will, retirement plan, and life insurance policy are all ways you care for your loved ones and plan for their future. We are so grateful for the many supporters who, while planning for the future of their loved ones, also choose to leave a gift to our House to care for our families.

**Impact and inspiration for generations to come:** These special and very thoughtful gifts are investments in our future. They allow us to serve more families, grow our endowment, and ensure our continued financial stability. They are also an inspirational expression of what is most important to you and what you hold near and dear to your heart.

"To be able to come to the House and eat a home cooked meal together gave us the opportunity to regroup and recharge together outside of the hospital," Lauren says, "At dinner, we also often met and caught up with other residents at the house who became new and old friends with whom we often had a lot in common and stay in touch with even after leaving the house."

By including a gift to our Ronald McDonald House in your will, retirement plan, or life insurance policy, you can provide strength, comfort, and hope to future guest families when it matters most.

# MAKE A LASTING DIFFERENCE

**RMHC of the Carolinas Planned Giving** is a vital part of the long-term future of Ronald McDonald House Charities of the Carolinas. By remembering RMHCC in your will or estate plans, you help make sure that we can provide a "home away from home" for future generations of guest families. There are many forms of planned gifts. Often a planned gift can help you make a more significant gift than you might have otherwise imagined—without sacrificing income or security for your own family.

**"The most important aspect of staying at The Ronald McDonald House is the people here and how welcoming and understanding they are. It is already hard having a toddler with such a condition and being an international patient where we need to fly back and forth."**
